2609GN-R FiberLAN Rack-mount GPON ONT

Next generation FiberLAN MDU ONT optimized for desktop and wall-mount installations using DZS leading-edge GPON technology.

Features & Benefits

- + Supports 2.5Gbps/1.25Gbps (Downstream/Upstream) with integrated GPON WAN interface
- + Eight gigabit multi-rate 10/100/1000M Ethernet interfaces
- + 802.3af, at, and bt PoE++ compliant
- + Up to 240W of PoE power per ONT
- + Enterprise LAN features (802.1x, LLDP)

The DZS 2609GN-R series GPON ONTs is the next generation of ONTs designed for Enterprise and Hospitality deployments requiring hardened rack-mount or wall-mount installations. The ONT provides customers with 8 x 1GigE LAN ports, all with PoE++ capability, allowing for convenient connections to IP phones, PTZ cameras, wireless access points, and remote switches. Configurable per-port PoE limits help direct power where it is needed. The 2609GN-R LAN ports can be separated into different services allowing the configuration of dedicated ports for IP video and data for one or more business work groups or departments. Unique VLANs may be configured per user to ensure full isolation of each department's data traffic.

The DZS 2609GN-R includes one SC/APC GPON interface, eight 10/100/1000Base-T ports, all with PoE++ capability allowing for powered connections to IP devices. Configurable per-port PoE limits up to 60W on any port and 240W per system. The 2609GN-R is powered by a nominal 48-56VDC source from a centralized power distribution system that may also provide battery backup. Rack-mount flanges allow ONTs to be installed in a number of different configurations including optional 19" rack-mount units.

Service Scenario

The FiberLAN GPON network consists of an Optical Line Termination (OLT) located in a central location, and a set of Enterprise grade Optical Network Terminals (ONTs). All Ethernet LAN ports can be separated into different services allowing the configuration of dedicated ports for IP video and data for one or more business work groups or departments. Unique VLANs may be configured per user to ensure full isolation of each department's data traffic.

With LLDP-MED support for voice VLAN advertisement, 802.1x authentication, and DZS Dynamic VLAN Mapping capability for handling complex sets of packet classification rules, operators can expertly manage traffic on each ONT LAN port to provide optimum customer experiences.
