

Reimagine Your **EDGE**

The DZS Edge Portfolio – Enable Gigabit Broadband Everywhere

Communications service providers (CSPs) are embracing edge transformation while making gigabit broadband available everywhere in their networks. AI-driven systems and software from DZS are leading the way. World-class DZS fiber access and optical transport platforms, industry-leading fixed wireless access (FWA), fiber extension (FTTdp) and home broadband solutions, all complemented by advanced cloud edge automation and orchestration software simplify transformation for CSPs. This powerful end-to-end portfolio provides innovative, future-ready solutions optimized to enable multi-gigabit broadband services to any location.

Velocity V6

- **Velocity is the industry's only AI-driven, Network Edge-ready portfolio**– hardened solutions in a range of flexible form factors that deliver world-leading performance and density with in-place upgrades from 10G to AI-integrated 50G PON technologies and beyond.

AurusLINK

DPU

- **Aurus FWA and fiber extension DPUs extend the reach of fiber-like services**– flexible, easy-to-deploy and often self-install solutions that bring gigabit speeds via licensed 4G/5G spectrum, Wi-Fi and Gfast to where fiber cannot feasibly reach – MDUs, remote locations, hard-to-reach areas – via a range of hardened form factors.

ONTs/Gateways/WiFi

- **Helix, CloudMesh and FiberLAN solutions feature world-class performance and coverage to the home/enterprise**– residential and business ONTs, access points, gateways and routers with world-class Wi-Fi 6/6E/7 and business-class connectivity and proven interoperability.

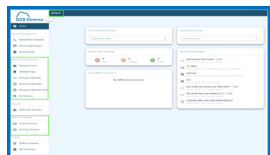

Saber 4400

- **Saber Optical Edge transport solutions redefine the middle-mile and metro-edge with the world's first hardened, compact DWDM transport platforms**– featuring 100G-400G per lambda, multi-degree CDC FlexGrid ROADM, low latency switching and advanced timing for xHaul and high-performance enterprise applications.

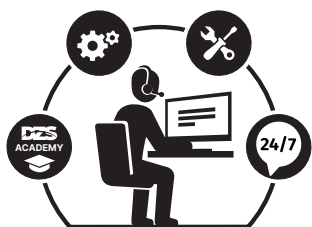

Reimagine Your **EDGE**

Xtreme

- **DZS Xtreme give you the SDN-driven Cloud Software you need to command the Network and Optical Edge and accelerate new service delivery**— cloud management software that enables vendor-agnostic network orchestration and automation, and dramatically accelerates new services onboarding and new equipment turn-up, administration, and management.

**Professional Services
& Customer Care**

- **DZS Professional Services and Customer Care help CSPs and enterprises transform faster with more confidence**— tailored services help your accelerate network change and give you a competitive edge via an array of option, from education/training, SLAs, remote/on-site professional services and managed services to custom services and 7x24x365 technical support.

From the Network Edge (Access and Optical) to home/enterprise Connectivity and the Cloud Software that analyzes, automates, orchestrates, and manages your network and accelerates the introduction of new services. DZS provides the industry's only end-to-end, standards-based solutions, giving DZS customers a true competitive edge.

DZS has already empowered many of the world's leading carriers to find their competitive edge, accelerate the deployment of new services, and connect advanced gigabit broadband services everywhere. [Let's partner](#) to accelerate your Network Edge, Connectivity and Cloud Software transformation strategy.

**Reimagine *your* edge and deliver AI-driven
future-ready broadband everywhere.**
