

Reimagine Your **EDGE**

## The DZS Edge Portfolio – Enable Gigabit Broadband Everywhere

Communications service providers (CSPs) and enterprises are experiencing the dual strategic and business imperative of edge transformation while making gigabit broadband available everywhere in their networks. AI-driven systems and software from DZS are leading the way. Recently expanded through our acquisition of world-class fixed wireless access (FWA), fiber extension (FTTdP), home broadband, and industrial IoT products and expertise from NetComm Wireless, the comprehensive DZS Edge portfolio simplifies transformation for CSPs by providing innovative, future-ready solutions optimized to deliver gigabit and multi-gigabit services to any location. From the Network Edge (Access and Optical) to home/enterprise Connectivity and the Cloud Software that analyzes, automates, orchestrates, assures and manages your network and services, DZS provides the industry's only complete end-to-end, standards-based solutions, giving DZS customers a true Competitive Edge.

Velocity V6

- **Velocity is the industry's only AI-driven, Network Edge-ready portfolio**– hardened solutions in a range of flexible form factors that deliver world-leading performance and density with in-place upgrades from 10G to AI-integrated 50G PON technologies and beyond.

AurusLINK

DPU

- **Aurus FWA, fiber extension DPUs, and industrial IoT solutions extend the reach of fiber-like services**– flexible, easy-to-deploy and often self-install solutions that bring gigabit speeds via licensed 4G/5G spectrum, Wi-Fi and Gfast to where fiber cannot reach via a range of hardened form factors that connect urban, suburban, MDUs and rural environments from the last 100m to the most remote customer.

ONTs/Gateways/WiFi

- **Helix, CloudMesh and FiberLAN solutions feature world-class performance and experiences to the home/enterprise**– Residential & business ONTs, access points, gateways and routers with world-class Wi-Fi 6/6E/7 and business-class connectivity and proven interoperability.

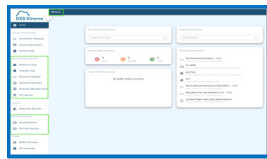

Saber 4400

- **Saber redefines the Network Edge (Optical and Mobile) with the world's first hardened, compact DWDM transport platforms**– Featuring 100G-400G per lambda, multi-degree CDC FlexGrid ROADMs, low latency switching and advanced timing for xHaul and high-performance enterprise applications.

Reimagine Your **EDGE**

- **DZS Cloud gives you the AI-driven Cloud Software you need to command the Network Edge and Connected Home/Enterprise**– provides the AI analytics, actionable insights, and control at the Network Edge and customer premises that enable the ultimate subscriber experience, unparalleled operational efficiency and multi-vendor orchestration and management:

Xtreme

- **Xtreme** software enables vendor-agnostic network orchestration and automation, and dramatically accelerated new services on-boarding and new equipment turn-up, administration, and management.

- **Espresso** and **CloudCheck** offer cloud-native and AI-driven network and service assurance and Wi-Fi experience management solutions, enhanced by the expertise gleaned from 50M+ subscribers globally. CSPs deploying this software see dramatically improved end-to-end network and service performance visibility, operational efficiencies through remote troubleshooting and proactive problem interception, increased ARPU, reduced churn, and improved customer satisfaction.

Espresso & CloudCheck

Training Programs

- **DZS Professional Services & Customer Care** help CSPs and enterprises transform faster with more confidence – tailored services help you accelerate network change and give you a competitive edge via an array of option, from education/training, SLAs, remote/on-site professional services and managed services to custom services and 7x24x365 technical support.

DZS has already empowered many of the world's leading carriers to find their competitive edge, deliver the ultimate subscriber experience, and connect advanced gigabit broadband services everywhere. [Let's partner](#) to accelerate your Network Edge, Connectivity and Cloud Software transformation strategy.

**Reimagine YOUR edge and deliver AI-driven gigabit broadband everywhere.**
